The Worker

Basic Handset Recommendations

The Worker is looking for a basic yet reliable handset that help them manage their inbound and outbound calling.

Their role will not require them to manage a high volume of calls each day.

They will most likely have accompanied technology to help if they are a hybrid worker as well – softphone, headset and or mobile.

These simple yet reliable options are ideal for The *Worker's* of any business. Offering an opportunity to add on to their phone system if they wanted to and for them to strip back the technology and effectively use it for the handset's basic functionality.

Evolve IP

Recommends...

Cisco 6851

The Cisco 6851 offers a budget-friendly, easy to use IP desk phone with multiplatform support for third-party hosted deployments. Featuring an attractive ergonomic design and Gigabit Ethernet connection as standard, the 6851 offers a reliable, secure device with a range of features including programmable line keys, tri-colour LEDs for waiting/incoming call indication and a 3.5" greyscale display with white backlighting for easy reading.

Snom D713

The distinctly designed D713 is the cost-effective entry device into the professional world of VoIP telephony. Available in black, it fits perfectly into any work environment, combining the latest technology and the best voice quality at an unbeatable price. The high-resolution colour display enables the flexible labelling solution SmartLabel for the 4 freely programmable LED function keys. The D713 is equipped with a gigabit switch with PoE support.

Yealink T34W

An entry-level color screen IP phone with high performance, Yealink SIP-T34W offers support for 4 lines and includes local 5-way conferencing. For its fashionable appearance as well as an extra-large 320x240-pixel color display with backlight, it brings comfortable operation experience and clear visual experience for users. With the built-in dual-band 2.4G/5G Wi-Fi, the T34W ensures you to keep up with the latest wireless technology and gain an advantage in the future wireless era.

The Office Professional

Integrated Hardware

The Office Professional will be experienced and understand how to optimise their workspace. They will be looking for a handset that can work alongside their workspace, enabling them to manage their team and communications effectively.

These handsets offer an ample number of features for any Office Professional to create the workspace that they need. Fantastic for those who manage a high volume of calls and easily integrate with a business's cloud communications system.

Evolve IP

Recommends...

Cisco 8851

The Cisco 8851 IP Phone forms part of the 8800 Series. It features a large 5" high resolution, colour display for increased productivity as well as wideband audio for crystal clear voice communications. This IP phone supports many advanced features including an in-built Gigabit Ethernet switch, bluetooth capabilities and a USB port.

The Cisco 8851 supports five programmable line keys which you can configure to support either multiple directory numbers or calling features such as speed dial / BLF. This phone is compatible with up to 2 8800 Key Expansion Modules for even more programmable function keys.

Polycom VVX 450

The Polycom VVX 450 is a twelve-line, high quality IP desk phone with a 4.3" colour LCD screen. Ideal for businesses of all sizes, the VVX 450 is a great device for knowledge workers, executives and upper management. With additional features such as two Gigabit Ethernet ports, two integrated USB ports and illuminated audio keys, the VVX 450 combines an attractive ergonomic hardware design with an intuitive user interface.

Offering both Polycom® HD Voice and Polycoma® Acoustic Fence technologies, the VVX 350 delivers exceptional voice quality, helping to keep conversations free from external noise, echoes and distraction.

Yealink T46U

The Yealink T46U offers users a well-rounded solution along with a high resolution TFT colour display. Integrating Yealink's Optima HD voice technology and powerful chipset to offer a better overall performance. Featuring dual USB ports, the T46U can make use of an external USB WiFi or Bluetooth dongle as well as USB headsets like the Yealink UH33/34. Also, users can daisy chain up 3 Yealink EXP43 expansion modules to expand the T46Us functionality. What's more the T46U can offer a reliable and scalable solution to meet the needs of a growing business allowing up to a 10-way conference call.

The Senior Executive

Statement Technology

The Senior Executive will be running and attending many meetings throughout the day and wants the top of the range handset at their side.

Either of these handsets is perfect for those team members who want to have top-of-the-range technology. Not usually a big seller but you will find a select group of team members will desire the best hardware in their office.

Evolve IP

Recommends...

Poly CCX 600

The Poly CCX 600 is a business media phone designed for managers and executives that use Microsoft Teams.

The Poly CCX 600 features a 7-inch colour multi-touch LCD screen with active Microsoft Teams experience. Poly's HD Voice and Acoustic Clarity provide HD audio while Full-Duplex technology enables unclipped two-way speech.

The CCX 600 supports wired and wireless headsets via integrated USB and Bluetooth technology.

The CCX 600 also boasts built-in Wi-Fi support.

The Poly CCX 600 features a two port Gigabit Ethernet switch for fast data transfer and supports PoE (PSU sold separately).

Yealink T58W

The Yealink T58W is a simple to use business phone that comes enriched by Yealink's high quality HD audio and user experience for an all-in-one business professional desk phone.

Making the T58W and ideal replacement to the T58A. With productivity-enhancing visual communication, the T58W offers users a generous 7-inch full colour HD touch screen with up to 16 SIP accounts and 3-way video conferencing.

As well as a wired handset that can be upgraded to a Bluetooth BTH58 handset if preferred or comes as standard with the T58W PRO variant.

The Constant Caller

High Call Volume Recommendations

The Constant Caller's main role will be managing the front-line communications for a business. Being mainly fixed to their desk, having a powerful handset to manage their roles requirements will be a game changer and an essential piece for them to thrive in their role.

Both handsets below can provide the support that any reception role requires. You can confidentially offer these two handsets and know that your customers can rely on the hardware that you have provided them. Fantastic piece of kit that will support a business of any size.

Evolve IP

Recommends...

Poly VVX 450 & EMP50

The Polycom VVX EM50 is easy to install and designed exclusively for the Polycom VVX 450 business IP phone. It's an optimal solution for telephone attendants, receptionists, administrative staff and other power users who manage multiple workflows or simultaneous calls on a daily basis.

Yealink T46U & EXP43

Designed to expand the functionality of the Yealink T4U series, the EXP43 is a colour expansion module, featuring 20 flexible buttons which are displayed on the EXP43's large 4.3 inch colour LCD screen. What's more, these buttons can be programmed with up to 60 various features displayed over 3 pages.

Mobility Worker

Taking calls on the move

The mobility worker is on the move across large locations and between sites. The technology needed requires to be hard wearing and safe for the worker to utilise whilst remaining on the organisations network and maintaining signal.

The devices we have chosen support the mobility worker by using rigorously tested hardware that you can rely on, whilst being able to oversee and manage your team effectively.

Evolve IP

Recommends...

Yealink AX83H

AX83H is an enterprise portable Wi-Fi IP color screen phone that meets wireless communication needs. The AX83H supports registering up to four SIP accounts and features a 2.4-inch color display. It integrates Yealink's Optima HD Audio and Smart Noise cancellation technology to deliver exceptional audio quality and clear voice communication. It is equipped with a built-in Bluetooth 5.0 module and a dual-band 2.4G/5G Wi-Fi 6 module, combined with advanced seamless roaming technology, allowing you to stay ahead in the ever-evolving wireless era. In addition, AX83H is equipped with a 2000mAh battery, with a talk time of 9 hours and a standby time of 200 hours. It is widely used in various wireless scenarios such as SMEs, offices, warehouses, supermarkets, and hotels.

Yealink W70B

The Yealink W70B is the DECT IP base station for small and medium-sized businesses. Paring with up to a total of 10 Yealink W73H/W78H/W53H/W56H/W59R/W57R/CP930W/CP935W/color screen DDPHONE (T54W+DD10K) DECT handsets or WH62/WH63/WH62/WH63/WHM621 with Charging Cable/WHD622 with Charging Cable/WHM631 with Charging Cable headsets, W70B allows you to enjoy superb mobility and efficient flexibility immediately as well as significantly eliminates additional wiring troubles and charges.

Yealink W73H

The Yealink W73H DECT handset is a wireless business telephone with a modern and elegant design. It is easy to carry and has better battery life and communication quality. Compatible with Yealink W70B Dect Base Station and the W90 multi-cell system, as a W73P system (W73H + W70B) up to 10 handsets, 10 SIP accounts and 20 simultaneous calls can be supported, 1.8" TFT colour display with 128 x 160 pixels, with HD sound.

Evolve IP

Recommends...

Snom M30

The Snom M30 is a DECT cordless handset designed for professional office environments. It features a 2-inch color TFT-LCD display, a backlit keypad with 28 hard keys, and offers features like HD audio, speakerphone, and directory support. The handset is compatible with Snom M400, M700, and M900 base stations.

Snom M70

The Snom M70 is a ruggedized DECT handset designed for office environments, featuring a compact and robust design with a high-resolution color LCD screen and HD audio. It is compatible with Snom M300 and M700 base stations.

Evolve IP

Recommends...

Snom M700

The M700 is a Snom IP DECT multi-cell base station that provides wireless VoIP coverage for multiple floors or large buildings. It can be used as a single cell or as part of a multi-cell system. In a multi-cell configuration, one base station acts as the primary station, and other base stations are added as secondary stations within the same network.

Snom M900

The Snom M900 is a DECT base station for large-scale, scalable cordless telephony solutions. It features an integrated DECT manager for managing multiple bases, support for seamless call handover, and over-the-air software updates for handsets. The M900 can manage up to 4,000 bases and 16,000 handsets, making it suitable for both small offices and large organizations.

Jabra

Headset - Technology Partner

Evolve IP and Jabra share a common vision for technology and the responsibility that comes with it. Choosing Jabra as Evolve IP's primary headset partner was a natural decision, one grounded in a shared commitment to delivering reliable, high-performance solutions.

By aligning with Jabra, we're ensuring our partners have access to the right end-points for every role, enabling them to deliver exceptional experiences to their customers.

**Together, we're shaping a smarter, more connected workplace.
Delivering innovation to partners.**

What does your customer need?

TOP TIP: Take advantage of Jabra's Compatibility Guide for you to double check that the technology you are providing can support your customer's needs.

<https://www.jabra.co.uk/compatibilityguide>

How does your customer work and how can their headset best support them is the best place to start. The Evolve IP team has created a simple use case diagram to easily understand what to recommend and support your customers.

Yealink

Evolve IP and Yealink are enabling high-performance audio for the hybrid workforce — which is why we've chosen to align with Yealink as a trusted headset vendor.

By combining Yealink's cutting-edge hardware with the strength of Evolve IP's channel-first approach and partner programme, resellers are empowered to lead confident customer conversations, deliver added value, and meet evolving demands with ease.

Add Ons

Supporting businesses with bespoke networks and systems requires carefully selected hardware options that are reliable, offer quality and guarantee high levels of security.

Analogue Telephone Adaptors - ATA

Cisco 192

The ATA 192 is the preferred solution to address the needs of customers who connect to enterprise networks, small offices, or unified communications as a service from the cloud. It has two standard FXS ports, which can be configured independently as two Session Initiation Protocol (SIP) registrations. It also has two 100BASE-T ports with an integrated high-performance router to extend local network connectivity. With the ATA 192, customers can protect and extend their existing investment in analog systems, as well as smooth their migration to pure voice over IP in a more affordable and reliable way.

Grandstream HT801 - HT802

Designed for users looking to connect their analog devices to a VoIP network at home or in the office. The HT802 is a powerful analog telephone adapter that is easily deployable and manageable. It comes equipped with 2 FXS ports to create a high-quality network solution.

Evolve IP

Recommends...

Grandstream 48 Port

The GXW4200 series allows any business to seamlessly connect devices within a location or within multiple locations to an IP PBX system, or with an existing traditional phone system. The GXW4216/24/32/48 are fully compliant with SIP standard and interoperable with various VoIP systems, analogue PBX and phones on the market. It features multiple FXS analogue telephone ports, superb voice quality, a suite of telephony functionalities, easy provisioning, flexible dialling plans, advanced security protection and strong performance in handling high volume voice calls. The GXW42XX series gateways offers businesses a cost-effective hybrid IP and analogue telephone system that allows them to enjoy the benefits of VoIP communications.

Sangoma Vega 3050G

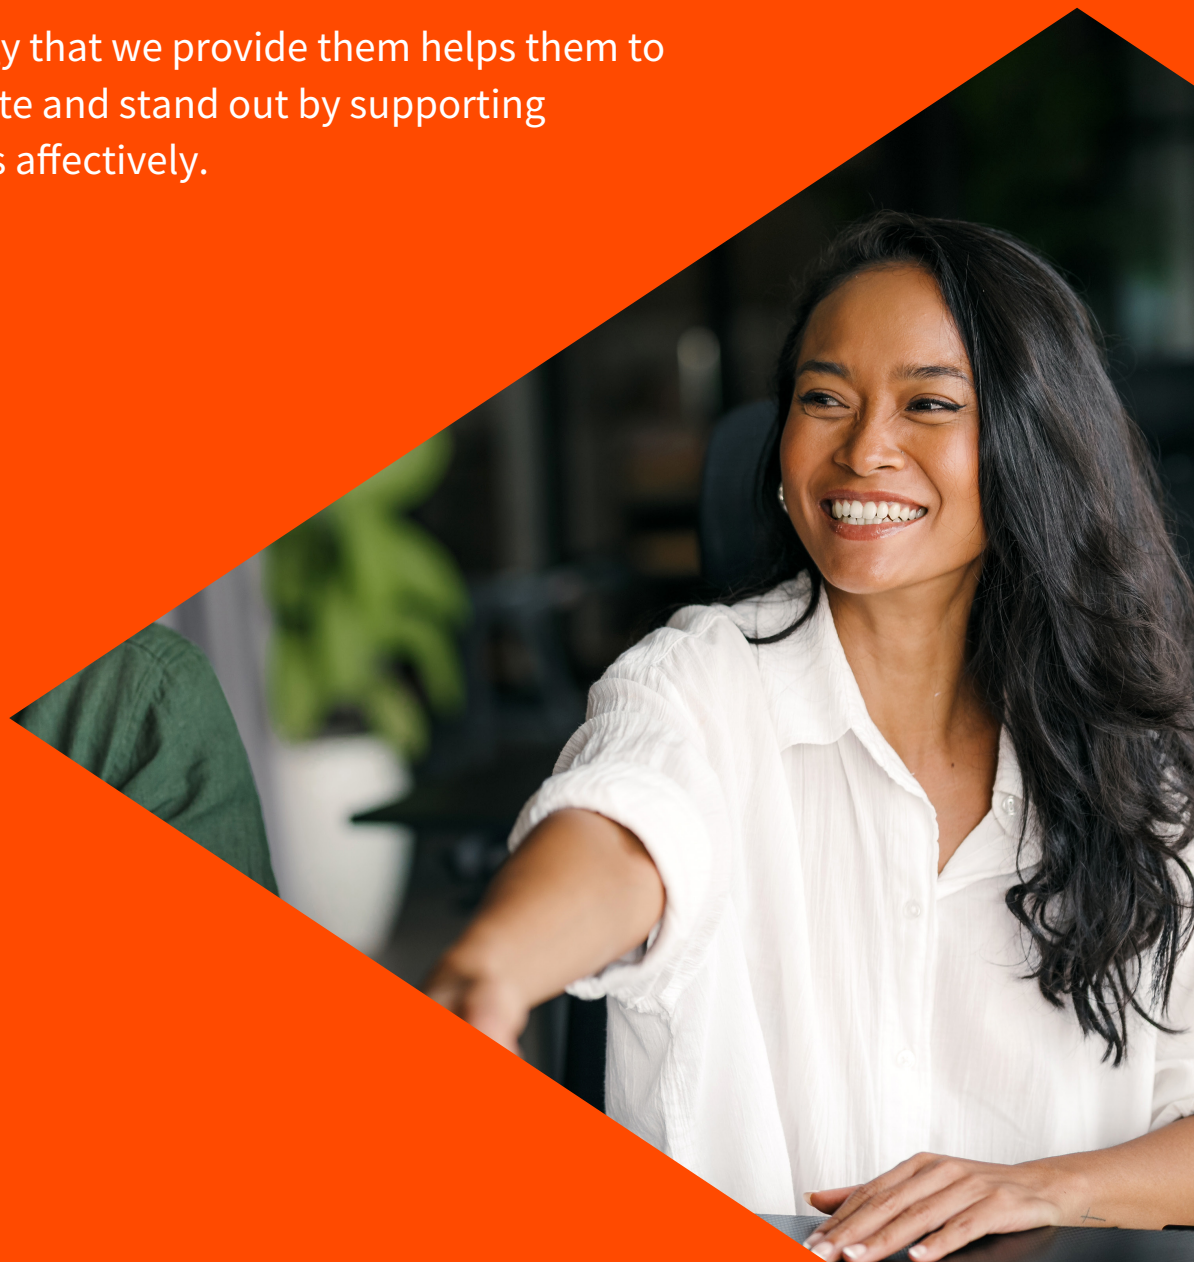

The Vega 3050G analog VoIP gateway allows businesses to connect VoIP and PSTN networks together without changing their infrastructure. It offers support for T.38 faxing, TLS and SRTP, flexible routing, built-in call tracing and debugging utilities, and has a Message Waiting Indicator.

Vertical Specialists

Working with our partners we help them target certain verticals so they can thrive as a specialist in particular industries.

Technology that we provide them helps them to differentiate and stand out by supporting businesses affectively.

Hospitality

Industry Solutions

We have chosen hardware that we use in large global deployments that effectively support leading hotelier brands.

Evolve IP

Recommends...

Snom HM201

Wireless freedom in a stylish, sleek package. This flexible system meets the modern styling and small footprint needs of today's hotel rooms. The Hidden Base allows for flexible room placement and reduces cabling costs. Cordless design increases mobility, while antibacterial plastic handsets protect guests and staff from germs. Mix and match up to 4 cordless handsets HM2 with each base station.

GPO 746 SIP

The GPO 746 Push Button Telephone is one of the most popular telephones ever designed. A slice of British history, this telephone features an authentic bell ring with easy-to-use, pushbutton dialing.

Retail

Industry Solutions

Brand hardware easily and deploy seamless uc systems across multiple sites using these hardware recommendations from the team.

Evolve IP

Recommends...

Yealink T31G

As a very fashionable and friendly entry-level Gigabit IP phone, Yealink SIP-T31G has an extra-large 132x64-pixel graphical LCD with backlight that brings clear visual experience for users. The T31G offers support for two VoIP accounts and includes local 5-way conferencing to maximize productivity. Working with the adjustable multi-angle stand, the T31G IP phone ensures you to work in different situation. Meanwhile, the T31G features built-in Power over Ethernet (PoE) and superb high definition (HD) sound quality. Easy-to-use and powerful features together with reasonable price deliver excellent voice communications solution.

Yealink W73H

The Yealink W73H DECT handset is a wireless business telephone with a modern and elegant design. It is easy to carry and has better battery life and communication quality. Compatible with Yealink W70B Dect Base Station and the W90 multi-cell system, as a W73P system (W73H + W70B) up to 10 handsets, 10 SIP accounts and 20 simultaneous calls can be supported, 1.8" TFT colour display with 128 x 160 pixels, with HD sound.

Yealink WH64

The WH64 is a wireless headset for business communication. It integrates DECT and Bluetooth modes, offering efficiency and flexibility. Its advanced acoustic shield technology 2.0 filters out background noise for clear sound transmission. The busylight signals your call status to avoid interruptions. Ergonomically designed for an all-day comfortable wearing experience. With high-quality materials and a lightweight build, it provides a solid experience. It connects seamlessly with IP phones and UC platforms for plug-and-play and device switching. Ideal for clear conversations and smooth office experiences.

Evolve IP

Recommends...

Snom A190

Modern DECT headsets offer many advantages in daily business life. They provide mobility and effectiveness at the same time – because your hands are free to take notes, type or carry something from A to B. Headsets have to fulfil a variety of requirements. For example, they have to be lightweight and comfortable to wear while meeting high quality and excellent sound standards. Moreover, headsets need an extended coverage range to be able to make calls anywhere. With the new Snom A190 multicell DECT headsets, we not only exceed these requirements, we also revolutionize mobility in the workplace.

Fanvil A10

The Fanvil A10 and A10W SIP mini intercoms are a cutting-edge solution tailored for indoor environments requiring reliable security, seamless intercom, and efficient broadcasting functionality. With a compact, fashionable design, these devices feature two SIP accounts, three detachable function buttons, and a PoE power supply. The A10 series also boasts HD audio, IP54 waterproof and dustproof certification, and built-in 2.4G and 5G Wi-Fi for the A10W variant, ensuring a high-quality communication experience.

Designed to adapt to diverse indoor scenarios, the A10 series is ideal for apartment complexes, office buildings, or commercial settings. The A10's built-in 2W speaker, Acoustic Echo Canceller (AEC), and support for the G.722 and Opus codecs guarantee crystal-clear audio communication, while the integrated short circuit input/output interface expands its connectivity options.
